SIGNATUREBRIDGE

**NetDocuments® and DocuSign® integration made simple**

Secure, Cloud-based Document Management Meets eSignature Management

SignatureBridge from Trumpet, Inc. bridges the gap between your documents and your decisions, allowing you to automatically route documents from NetDocuments for eSignature via DocuSign.

> **NetDocuments** is the leader in cloud-based document and e-mail management, delivering the highest levels of security, predictability and usability to the legal market.
>
> **DocuSign** is changing how business gets done by empowering anyone to transact anytime, anywhere, on any device with trust and confidence. DocuSign keeps life moving forward.

Together, NetDocuments and DocuSign make it easy to securely access, collaborate and manage documents that require signature. By using SignatureBridge to combine them, you can increase productivity, collaborate securely, and gain end-to-end document visibility.

Close the Loop

One of the biggest challenges in managing multiple signatures across hundreds or thousands of documents is ensuring that signed documents are returned to a secure, easy-to-access system of record. SignatureBridge closes the loop, ensuring that no signature and no document is left behind.

The Process is Simple

SignatureBridge ensures that digitally-signed documents are properly filed and maintained within NetDocuments by automatically checking the documents out of system when they are routed for signature. Once they've been signed using DocuSign, SignatureBridge checks them back in. At any point in the process, users can instantly monitor signature status and identify the number of outstanding signatures.

The Solution is Clear

SignatureBridge Bridges the Gap

+ **Route Documents for eSignature**
  Send out files from NetDocuments to multiple users for eSignature using DocuSign.

+ **Monitor eSignature Status**
  Instantly identify documents routed for signature and monitor signature status from within NetDocuments.

+ **Aggregate Signed Documents Automatically**
  Once all signatures have been captured, SignatureBridge automatically checks the document back into NetDocuments.

Get MORE Out of Your eSignature and Document Management Dollars

+ **Increase Productivity**
  Easily and efficiently review, comment, approve and sign documents, reducing errors and slashing agreement cycle times.

+ **Collaborate Securely**
  Control your documents and eSignatures while maintaining a clear audit trail.

+ **Achieve End-to-End Process Visibility**
  Monitor eSignature status during the document's entire lifecycle, identifying and eliminating bottlenecks.
